

Yashwant Kumar Singh

New Delhi, India | 8910343942 | yashwantkumarsingh439@gmail.com | LinkedIn: linkedin.com/yashwantkumarsingh | GitHub: github.com/Yashwant439

PROFESSIONAL SUMMARY

Passionate about building scalable real-time applications and secure backend systems using modern technologies. Skilled in Full-Stack development with hands-on project experience. Eager to contribute to collaborative environments, with a strong foundation in problem-solving, adaptability, and continuous learning. Actively involved in tech communities to grow technically and professionally. Seeking a full-time opportunity as a Full Stack Developer

EDUCATION

Bachelor of Technology in Computer Science Engineering (2024-2028)

Delhi Skill and Entrepreneurship University

Senior Secondary Education (CBSE) (2022-2023)

Saltlake Shiksha Niketan

SKILL SUMMARY

- **Languages:** HTML, CSS, JavaScript, Java, C, C++
- **Frameworks & Libraries:** React.js, Node.js, Express.js, Bootstrap, Tailwind CSS, EJS
- **Databases & APIs:** MongoDB, Mongoose, SQL, RESTful APIs
- **Tools & Build Tools:** Git, Hoppscotch, Nodemon, Visual Studio Code
- **Platforms & Deployment:** Render, GitHub
- **Soft Skills:** Problem-solving, Critical Thinking, Time Management, Teamwork, Analytical Thinking

PROJECTS

Wanderlust – Full-Stack Travel Experience Platform

- Developed a dynamic and responsive travel booking application based on the MVC architecture, enabling destination exploration, user-generated listings.
- Implemented using Node.js, Express.js, MongoDB, EJS, and Bootstrap, with modular routes, authentication middleware, and RESTful design principles.
- Integrated Leaflet.js for interactive map rendering and geolocation, Cloudinary for image uploads and optimization, and Axios for efficient client-side API communication.
- Focused on performance, scalability, and user experience through clean UI design and robust backend architecture.

Responsive Website Clones – UI Engineering Practice

- Recreated pixel-perfect, responsive clones of major brand websites (Spotify, Myntra, and Amazon) using HTML5, CSS3, focusing on layout structure, visual design, and responsiveness across screen sizes.
- Emphasized clean semantic markup, reusable CSS components, and mobile-first design principles.
